Risk Rating	Behavior Characteristics	Examples
5 Severe	Malicious applications or the applications that can bypass security	Botnet or Proxy applications
4 High	Applications that can cause malware infection or data leakage: often these applications are used for personal file-sharing or tunnelling other applications	P2P or Remote.Access applications
3 Elevated	Applications are used for personal communication or have known vulnerabilities	IM,Email,Storage.Backup applications
2 Guarded	Applications consume bandwidth or affect productivity	Game,Social.Media,Video/Audio applications
1 Low	Business applications or software update applications	Update or Business applications
